SUSTAINABILITY AND SOCIAL AWARENESS

The world is changing faster than ever before. Climate change is forcing us to design and manufacture products in a different way with more awareness of the impact on our environment and society. These two principles are strongly related and determine the pillars of our organization. Making sustainable products with social consciousness.

We believe in a circular economy where the lifetime of a product is extended to the max, but also the lifetime of a person is respected and improved. We do not only care of the people that will use our products, but also the people who are involved in the making of it. Taking care of our planet and the people that live on it is our mission.

Our big range of modular pods will guarantee the maximum flexibility that is required for the modern public or commercial environment that is changing all the time. The interchangeable components can be replaced and reused again because all parts are locally made and easy to adapt. Modularity and local production are the fundamentals of our circular way of manufacturing. Removable fabric covers, wall panels that can be changed for integrated tables, pods that can be connected, colors that match any corporate identity, our pods secure the needs of a long-term investment.

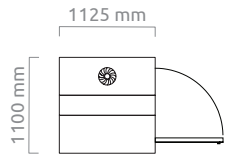

Explore more about the different sizes, carefully selected recycled materials and integrated technology.

MEETING POD

MEETING POD LARGE

MEETING POD XL

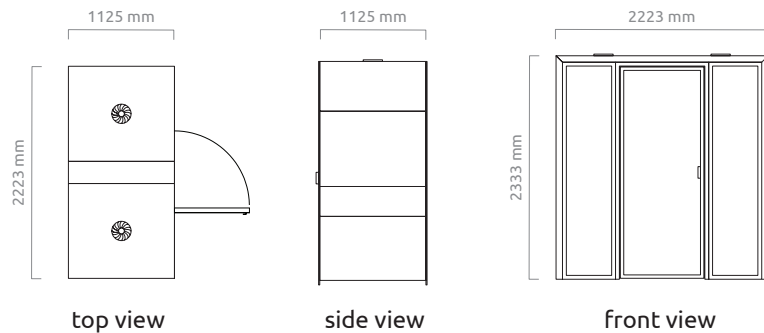

DUO POD

Suitable for 2 to maximum 3 people to fit in.

MEETING TABLES

Whether having a meeting at a high table with bar chairs, at a low table, or at a low table with integrated sofas, there are options to integrate technology and to share or present via an LCD screen. Power sockets can be integrated with HDMI-, DATA- or USB ports to connect your laptop or other devices. See page 33.

PANEL INTEGRATION

There are different integration options for the side panels, like an LCD panel with a shelf for the remote control. The back side of the DUO POD is completely transparent, made of three windows with layered glass connected to each other (without a closed panel in between).

MEETING TABLES HIGH

The space inside the Duo-pod offers enough room for two or three bar chairs or two integrated sofas. Bar chairs often require less space than task chairs or visitor chairs.

DUO POD with glass backside

Price category 1:

fabric range soto, rebo

Price category 2:

fabric range wooly, organi, eco felt

Price category 3:

fabric range main line flax, laminated panels outside

Price category 4:

fabric range blazer, laminated acoustic panels inside

Included:

- 2x led-lights 5watt with sensor integrated in ceiling.
- air ventilation integrated in ceiling.
- door with hidden magnet closing.
- 1x integrated power socket.

Optional:

- extra power sockets (see page 33).
- integrated side tables, shelf and sofa.
- integrated magnetic white boards.
- integrated lcd-screen panels.
- water sprinkler integrated on request.

MEETING TABLES

Whether having a meeting at a high table with bar chairs, or at a low table with integrated sofas, there are options to integrate technology and to share or present via an LCD screen. Power sockets can be integrated with HDMI-, DATA- or USB ports to connect your laptop or other devices. See page 33.

TABLES AT THE SIDE

Due to the bigger space inside the Meeting pod XL there are more integration options for different meeting tables. By mounting a high meeting table at the side there is enough room for 6 bar chairs. With the extended table top mounted at both side 8 bar chairs is possible (extra door at the backside is required).

EXTENDING PODS

All the Meeting and Duo pods can be connected to each other to extend the pods. The standard parts remain the same, but the floor plinths at the back will be replaced for connection brackets at both sides in order to create a larger floor inside without any plinths in the middle.

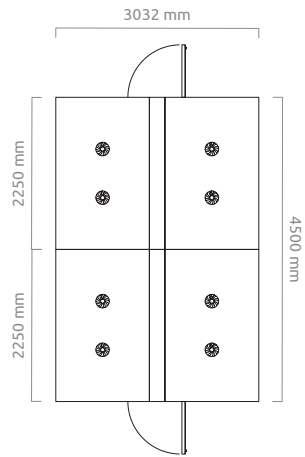

(A) Connected pod with an extra door at back side

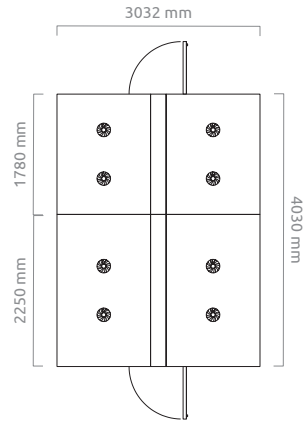

(B) Connected pod with upholstered mid-panel with table attached.

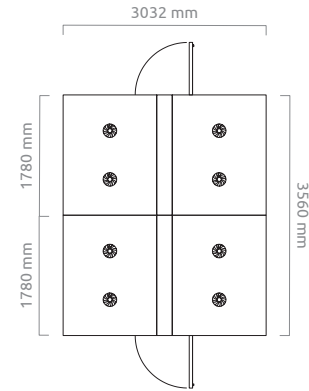

(C) Connected pod with transparent backside with three windows

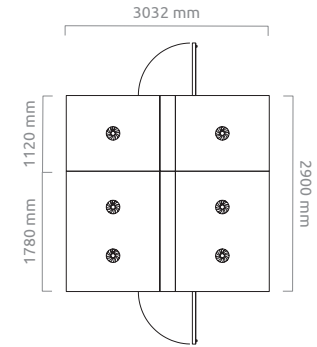

For 16 people maximum inside.

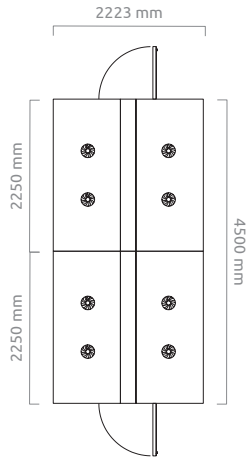

For 14 people maximum inside.

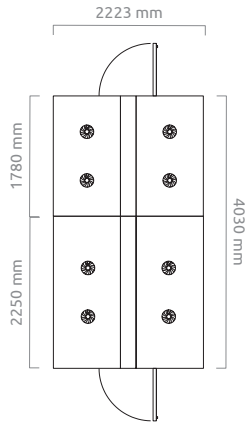

For 12 people maximum inside.

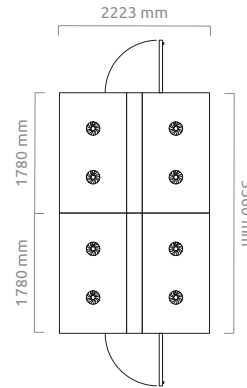

For 12 people maximum inside.

EXTENDING PODS

Create your own extended pod with a door at the front and back, or with an integrated meeting table or with transparent backside with three windows connected.

Prices for connected pods are available on request.

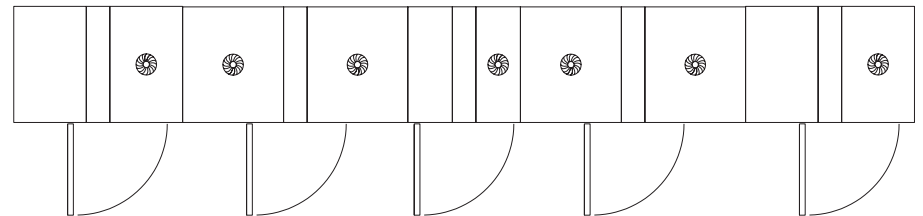

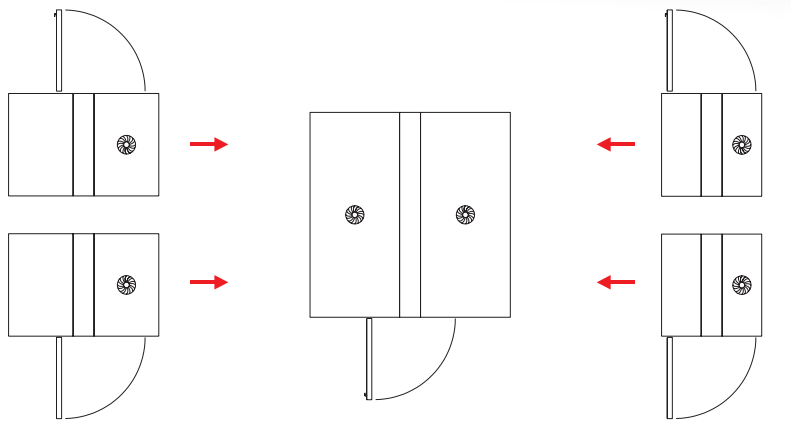

CONNECTING PODS TOGETHER

The pods with different dimensions can be connected next to each other. The small ventilation holes at the bottom remain open to ensure fresh air can enter the pods.

A small hole at each side in the ventilation plinth makes it possible to guide the power cords from one pod to the other. Also, on top the cables can be connected from one pod to the other pod.

Connecting pods together helps ensure an effective use of available space in the room.

2x work pod

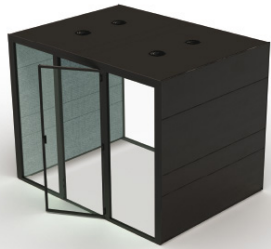

meeting pod large

2x phone pod

SHARING THE SAME GRID DIMENSIONS

The pods can also be placed back-to-back. The acoustic glass in between will not allow people to hear each other talking inside the adjacent pod.

Two Phone pods, Work pods or Duo pods in mirrored position share the same length as one Meeting pod Large or Meeting pod XL. A cluster with pods for single user or group of users can be combined in the same clustered block.

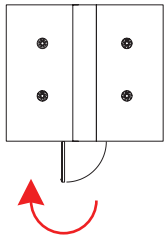

ADAPT THE DOOR DIRECTION

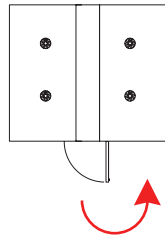

All the pods provide the option to change the door direction at location by rotating the door 180 degree and changing the left door cover with the right door cover.

This makes the pod fit in any floorplan possible, but also might be an unexpected necessity when the pod will be located to another place or when the surrounding interior will change in the future.

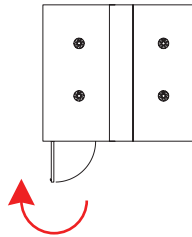

Door placed in the middle and turning left

Door placed in the middle and turning right

Door placed at the side (left & right possible)

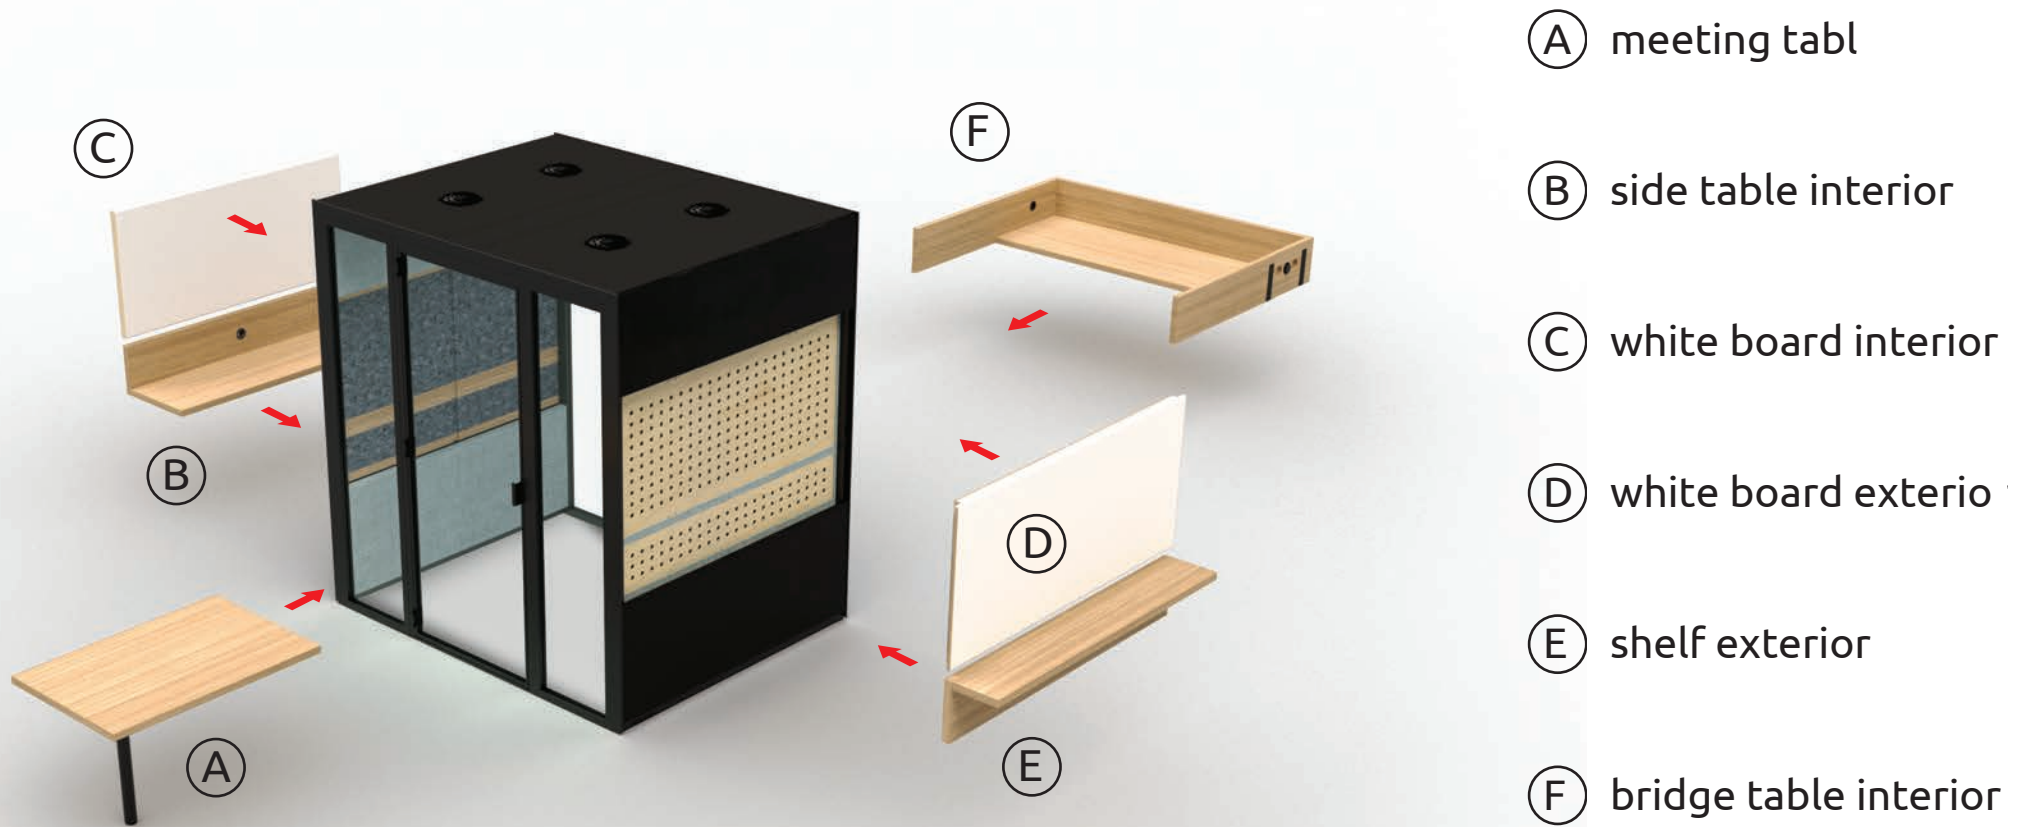

WHEELCHAIR ACCESSIBILITY

Most acoustic pods are not accessible for people in a wheelchair or using a walker. A raised floor is an obstacle that blocks older people or people with a physical handicap.

The eco pods of Ecolution don't have a raised floor and the 15mm high floor plinth is matching the European building certification standard. An extra rubber ramp can be added to make the pod even more accessible for wheelchairs and walkers.

Rubber doorstep ramp
900mm x 150mm x 15mm

- Ⓐ meeting table
- Ⓑ side table interior
- Ⓒ white board interior
- Ⓓ white board exterior
- Ⓔ shelf exterior
- Ⓕ bridge table interior

FLEXIBLE INTERIOR & EXTERIOR

Besides the differing pod dimensions, you can choose several interior and exterior options like integrated tables for laptop support, LCD-screens for video calling, White boards for brainstorm sessions and perfectly comfortable upholstered sofas for longer meeting sessions. A wide variety of different colors and textures can be selected for the acoustic panels at the inside and outside of these pods.

All optional interior & exterior elements are part of the same modular concept.

Interiors can be adapted in the future extending the lifetime of the product. All integrated tables are made of 100% recycled wood and available in 6 different finishes. The magnetic whiteboards offer the best quality available with an enamel top layer to avoid scratches and old marks.

Explore the different options and customize your pod to match your personal standards..

INTEGRATED EXTERIOR OPTIONS

SIDE TABLE in high position

- in high position 1050mm from floor
- in low position 750mm from floor
- table top 500mm deep, 40mm thick
- outside or inside of the pod
- max 3x power module integrated
- 100% recycled wood
- available different length
- available in different colours

SHELF in high position

- in high position 1050mm from floor
- in low position 750mm from floor
- top 250mm deep, 40mm thick
- outside or inside of the pod
- max 3x power module
- 100% recycled wood
- available different length
- available in different colours

LCD-SCREEN PANEL

- outside or inside of the pod
- lcd-bracket not included
- cable grommet included
- 100% recycled wood
- available different length
- available in different colours

MAGNETIC WHITE BOARD

- outside or inside of the pod
- white enamel coated surface
- no magnets or markers included
- aluminum profile on top and bottom

INTEGRATED INTERIOR OPTIONS

SOFA

- seating height from floor 460mm
- seating depth 480mm
- frame made of recycled wood
- contains Eco foam
- fabric covers removable with zipper
- feet 20mm adjustable
- available different length
- available in different eco-fabrics see page 41

HIGH SEAT

- suitable for Phone pod
- seating height from floor 900mm
- frame made of recycled wood
- contains Eco foam
- fabric covers removable with zipper
- feet 20mm adjustable
- teel mounting hooks included
- available in different eco-fabrics see page 41

- in high position 1050mm from floor
- in low position 750mm from floor
- top 800mm width, 40mm thick
- available different length
- column leg and bracket included
- table top 100% recycled wood
- available in different colours see page 49

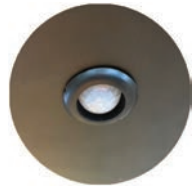

BRIDGE TABLE

- in high position 1050mm from floor
- in low position 750mm from floor
- knock down packaging
- top 700mm deep, 40mm thick
- available different length
- 100% recycled wood
- available in different colours see page 49

INTEGRATED LIGHTING & VENTILATION

A small motion detection sensor integrated in the ceiling activates the ventilators in the roof and the integrated LED lights in the ceiling when entering the pod. The silent ventilators suck out the hot air creating an airflow from bottom to top. Cold air is coming in through small holes in the floor plinths refreshing the air inside the pod in 2 minutes time. The temperature inside the pods remains the same as the surrounding space when shared with other persons at the same time.

230 volt RA

ventilation slots

ventilators

7-watt led spots

ELECTRIFICATION & CABLE MANAGEMENT

The pods can be connected to the network of building from each side at the floor or from the ceiling if preferable. Pods with a Mid-panel integrated in the back have an extra option using a 60mm diameter grommet placed 3cm above the floor in the middle. Because the panels at the outside and inside of the pod can be removed, a cable channel inside the wall is accessible and cables can be guided in any direction. All pods will be delivered with a GST18 power block with four gangs and two five meter GST18 cables to connect the pod with power sockets to the building.

110mm thick sound absorbing panels at both sides and at ceiling

F

50-shore rubber soft band underneath the floorplinths for different floor surfaces

ACOUSTIC PERFORMANCE

Don't take acoustics for granted. Confidential discussions should not always be shared with other people sharing the same room. Not only will the conversations of people inside the pods remain private, but also the people inside the pods will not be disturbed by conversations or other noises outside of the pod.

There are only three manufacturers in Europe that can offer an acoustic pod with the European standard for Acoustics in category A. Evolution is one of them!

The acoustic test report is available on request.

MAKE YOUR OWN

Furniture products and acoustic pods require not only a sustainable design today, but also have to offer a wide range of different colors and textures to match the high standards of a modern interior. The selection of colors in the working environment are often part of the corporate identity of the space.

Combinations of different textures create a perfect sense of ambiance and comfort for the people. Our mission is to offer maximum flexibility to select your own personal preferences, but also to make it possible to adapt the product in the future.

For each (removable) panel at the outside and inside of the meeting pods, a separate material, texture or color can be selected and even replaced for another new colorful texture in the future.

For the integrated sofas, several different ecofriendly fabric ranges have been selected offering a large scale of different colors. Similar to the sofas, the panels are also upholstered with removable covers.

A range of felt made of recycled textile offer 9 different unique colorful textures that can be combined with these fabrics or laminates.

The oak laminate finishes of the hard panels and integrated tables are available in several different tones from almost completely black to white wash oak.

If you can't find your color or texture from our standard collection, feel free to contact us for more options or technical advice of your own selected material.

We even offer the opportunity to collect your textile of your old interior and turn it into new felt with colors of your liking!

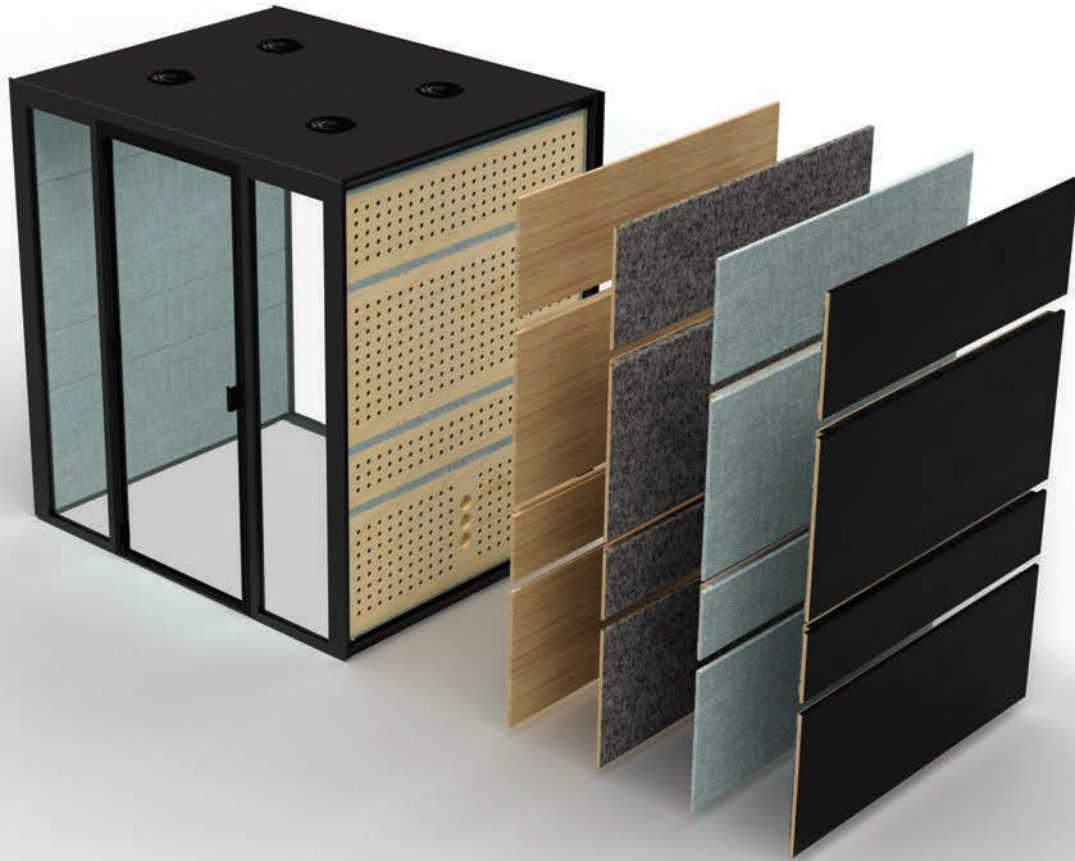

PANELS AT THE OUTSIDE

The outside of the pod is made of upholstered panels based on several different eco fabric ranges. Another option are panels laminated with felt made of textile waste. The third option is a choice of different finishes including four different woodgrain colors matching with the oak of the integrated tables.

Panels laminated in mat black is the third category making a perfect match with the RAL2005 black color of the aluminum frame.

All panel options are categorized in different price groups. Different panel materials can be mixed (prices on request).

upholstered eco-fabric panels

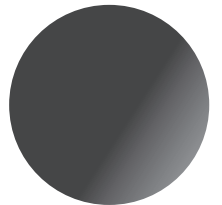

upholstered eco-felt panels

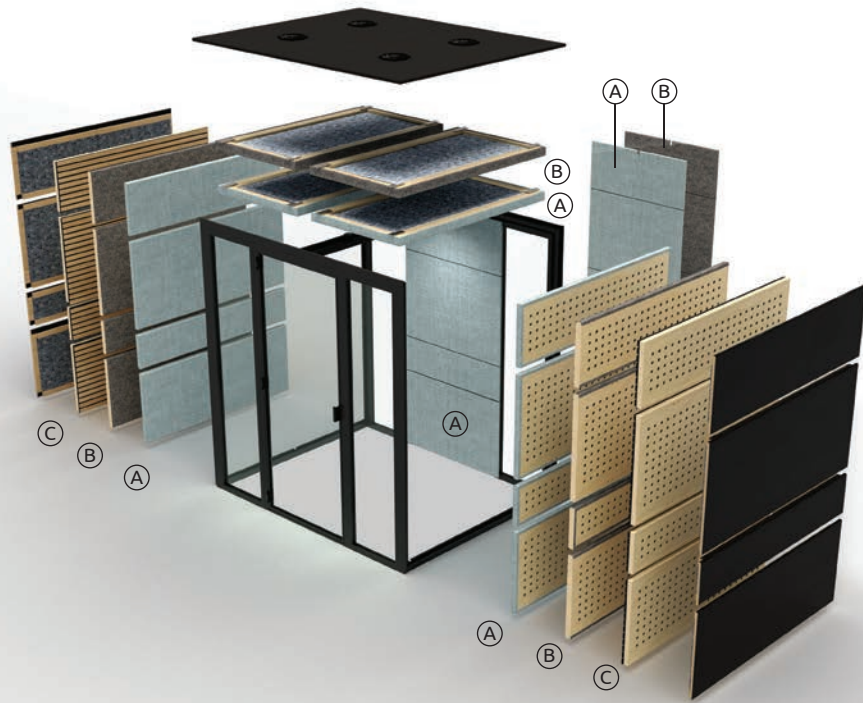

laminated eco panels wood grain

laminated eco panels black and more

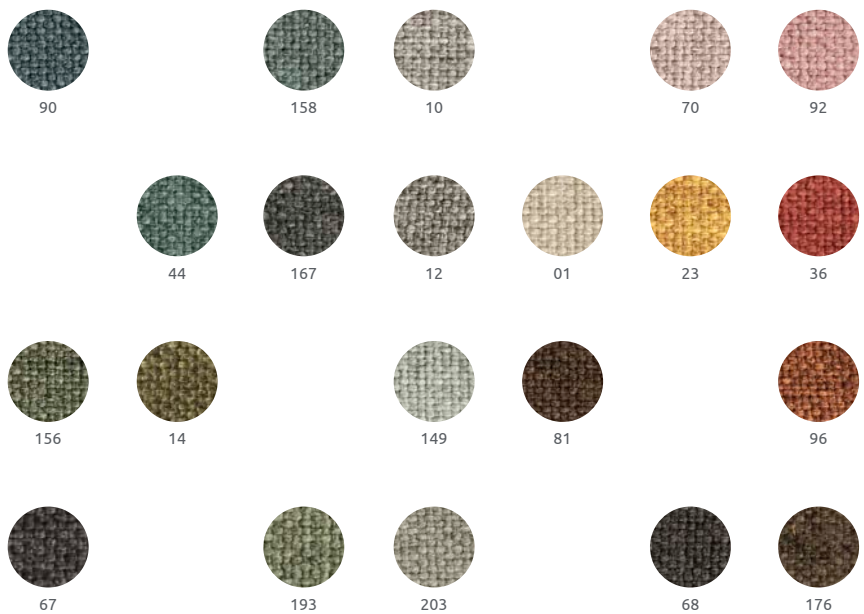

PANELS AT THE INSIDE

The panels at the inside of the pod are different from the panels at the outside, but share the same finishes except for the black solid panels and other laminated panels. These panels are not acoustic and can't absorb the soundwaves inside.

The woodgrain panels at the inside of the pods are different as well because the surface is perforated. These panels are acoustic due to this perforation. The core of the interior woodgrain panels is recycled MDF.

LAMINATED WOODGRAIN ECO PANELS INSIDE

The wood panels at the inside of the pod are different from the wood panels at the outside, but share the same woodgrain finishes. The surface is perforated in order to absorb the internal sound waves by the acoustic recycled textile between the inside and outside panels. Inside the 9mm deep grooves the black core of the recycled MDF is visible creating a beautiful pattern of horizontal lines that camouflage the little acoustic holes.

SUSTAINABLE PACKAGING

The world is changing faster than ever before. Climate change is forcing us to design and manufacture products in a different way with more awareness of the impact on our environment and society. These two principles are strongly related and determine the pillars of our organization. Making sustainable products with social consciousness.

GENERAL DELIVERY TERMS

1. Definitions

"the Supplier" means Ecolution-Design BV, Arnhemseweg Zuid 274 B, 3817 CR Amersfoort, The Netherlands "the Client" means the person, firm or company to be supplied with the Goods by the Supplier "Goods" means the goods, materials and/or other items to be supplied pursuant to the Contract "Contract" means the contract, order confirmation or order for sale and purchase of the Goods made between the Supplier and the Client to which these conditions apply.

2. Scope

These Conditions apply to all sales of Goods by the Supplier and shall prevail over any inconsistent terms or conditions contained or referred to in the Client's order or in correspondence or elsewhere, unless specifically agreed to in writing by the Supplier and any conditions or stipulations to the contrary are hereby excluded or extinguished.

3. Quotations

A quotation by the Supplier does not constitute an offer and the Supplier reserves the right to withdraw or amend the same at any time prior to the Supplier's acceptance of the Client's order.

4. Prices

The prices payable for the Goods shall (unless otherwise agreed upon in writing) be the Supplier's list prices therefore at the time of despatch.

5. Terms of payment

- a. Payment of invoices shall be made without any deduction or set-off in cash so as to be received by the Supplier not later than 14 days unless otherwise agreed in writing. Supplier shall have the right to claim and be paid interest at the rate of 12,5 percent per annum calculated on a day-to-day basis on all sums due to Supplier and unpaid for the period upon which payment is due until the date upon which payment is made both before and after any judgement.
- b. Nothing herein shall entitle the Client to withhold or delay any payment due to the Supplier after the date upon which it falls due or in anyway prejudice or affect Supplier's rights in relation to the said non-payment.
- c. If in the case of the Contract or any order involving more than one delivery default is made in payment on the due date the Supplier shall have the right - without prejudice to any other remedy which Supplier may have - to suspend all or any further deliveries pending payment or to terminate the Contract in its entirety by notice in writing to the Client.

6. Delivery

- a. Delivery dates mentioned in any quotation or acceptance form or elsewhere are approximate only and not of any contractual effect and the Supplier shall not be under any liability to the Client in respect of any failure to deliver on any particular date or dates. If delivery shall not have taken place within a reasonable time the Supplier's liability shall be limited to the value of the Goods specified in the Supplier's quotation or (where there is no quotation) the Supplier's acceptance of order. The Supplier shall not be required to deliver the Goods unless the Client shall have paid all sums then due and payable by the Client to the Supplier.
- b. If the Client refuses or fails to take delivery of Goods tendered in accordance with the Contract the Supplier shall be entitled to immediate payment in full for the Goods so tendered. The Supplier shall be entitled to store at the risk of the Client any Goods of which the Client refuses or fails to take delivery and the Client shall in addition to the purchase price pay all costs of such storage and any additional cost or carriage incurred as a result of such refusal or failure.
- c. The Goods shall unless delivered by the Supplier's own transport or by a carrier on behalf of the Supplier be deemed to have been delivered and the risks therein to have passed to the Client upon their transfer to the carrier named by the Client or (in the case of delivery "ex works") upon the Supplier notifying the Client that the Goods are available for collection.
- d. Where the Goods are to be delivered by the Supplier's own transport or by a carrier on behalf of the Supplier the risk therein shall pass to the Client upon delivery. The choice of route and mode of carriage shall be at the discretion of the Supplier. The Supplier shall advise the Client of the scheduled date of despatch from the Supplier's works and unless the Client notifies the Supplier in writing within 28 days the Supplier shall not be liable for any loss of or damage to the Goods in transit nor for failure of the Goods to be delivered and such Goods shall be deemed to have been delivered in good order and condition.

7. Title

- a. Supplier has the extensive title of the Goods. If there is any invoice from Supplier to Client unpaid and will remain unpaid, Supplier has the title of all former delivered Goods in possession of Client even if these Goods are fully paid. This is also called extensive reservation of ownership.
- b. Title to the Goods shall not pass to the Client until payment in full of the price therefore. Until such payment the Client shall have possession of the Goods as bailee for the Supplier and shall store the Goods in such a way as to enable them to be identified as the property of the Supplier provided that if the Client is purchasing the Goods for resale the Client may as agent for the Supplier sell and deliver the Goods to a third party in the ordinary course of the Client's business on condition that until such payment as aforesaid the Client shall hold all proceeds of such sales in trust for the Supplier and in a separate account. The Client hereby assigns to the Supplier all rights and claims which the Client may have against its customers arising from such sales until payment is made in full as aforesaid.

c. The Supplier reserves the right to re-possess any Goods in respect of which payment is overdue and thereafter to re-sell the same and for this purpose the Client hereby grants an irrevocable right and licence to the Supplier's servants and agents to enter upon all or any of its premises with or without vehicles during normal business hours. This right shall continue to subsist notwithstanding the termination of the Contract for any reason and is without prejudice to any accrued rights of the Supplier there under or otherwise.

8. Variations Slight deviations in quality, symmetry, format, colour, hardness, satin-finish and opacity shall not constitute grounds for rejection of the Goods by the Client.

9. Packaging

Packaging shall will be charged as Supplier uses special packaging. Packaging materials as such are returnable to Supplier and when fully returned a deposit will be refunded to Client. Costs for returning the packaging are on behalf of Client, unless otherwise agreed upon in writing or when given to Suppliers carrier during next delivery.

10. Third Party Rights

- a. The Client shall indemnify the Supplier against any and all claims costs demands and expenses incurred by or made against the Supplier as a direct or indirect result of the carrying out of any work required to be done on or to the Goods in accordance with the requirements or specifications of the Client involving any infringement or claim of infringement of any intellectual or industrial property right vested in any third party.
- b. In any case where the Goods are or are capable of becoming the subject of any industrial or intellectual property right of any third party the Supplier warrants that it shall transfer to the Client only such title as it may have to the Goods.

11. Warranty

- a. All Goods are sold on the understanding that Client will independently determine that the total quality and make-up of the Goods (including all adhesives, face materials, slitting tolerances, and resistance to environmental conditions) are suitable for his particular purpose.
- b. For his particular purpose all information, recommendations and descriptive material about Supplier's Goods are based upon research and tests believed to be reliable. They are intended only as a source of information and are given without guarantee and do not constitute a warranty.
- c. No salesman, representative or agent is authorized to give any guarantee, warranty, or make any representation contrary to the foregoing.
- d. Supplier's goods are manufactured under careful quality control. Without prejudice to the above provisions, the Supplier warrants that the delivered goods are free from defects in material and workmanship. The fact that delivered goods do not meet this warranty shall be communicated in writing to the Supplier within six weeks after delivery, or, if a period in deviation of this six weeks period has been agreed between the parties or is stated in the relevant product literature, within that period. The warranty obliges the Supplier exclusively to repair or replace the Goods, at the Supplier's option or, in the event that repair or replacement in the opinion of the Supplier is not practicable, commercially or otherwise, to issue a credit note to the Client not in excess of the original purchase price of the Goods.

12. Liability

- a. The Supplier shall not be liable to the Client:
 - i. for shortages of quantity delivered unless the Client notifies the Supplier of any claim for short delivery within 28 days of receipt of the Goods.
 - ii. for damage to or loss of the Goods or any part thereof in transit (where the Goods are carried by the Supplier's own transport or by a carrier on behalf of the Supplier) unless the Client shall notify the Supplier of any such claim within 28 days of receipt of the Goods or the scheduled date of delivery whichever shall be the earlier.
 - iii. for defects in the Goods caused by any act, neglect or default of the Client or of any third party.
 - iv. for other defects in the Goods resulting from faulty material or workmanship unless notified to the Supplier within 28 days of receipt of the Goods by the Buyer and before the Goods are processed or used or where the defect would not be apparent on reasonable inspection within the warranty period as described in Condition 11 d.
- b. The Supplier may at its option make good any shortage or non-delivery and/or as appropriate replace or repair any Goods found to be damaged or defective by reason of faulty material or workmanship provided that as a condition thereof the Supplier may require that the Goods concerned are returned to the Supplier within 28 days of discovery of the damage or defect.
- c. The Supplier's aggregate liability to the Client whether for negligence breach of contract misrepresentation or otherwise shall in no circumstances exceed the cost of the defective, damaged or undelivered Goods determined by net price invoiced to the Client in respect of any occurrence or series of occurrences.
- d. Subject to the foregoing all conditions, warranties and representations expressed or implied by statute common law or otherwise in relation to the Goods are hereby excluded and the Supplier shall be under no liability to the Client for any loss damage or injury direct or indirect resulting from defective material faulty workmanship or otherwise howsoever arising and whether or not caused by the negligence of the Supplier, its employees or agents.

GENERAL DELIVERY TERMS

13. Force Majeure

a. The Supplier shall not be liable to the Client for any loss or damage which may be suffered by the Client as a direct or indirect result of the Supplier being prevented, hindered or delayed in the performance of its obligations under the Contract by reason of any force majeure circumstances.

b. In this Condition "force majeure circumstances" shall mean any Act of God, war riot, strike, lock-out, trade dispute or labour disturbance, epidemic, accident, breakdown of plant or machinery, fire, explosion, flood, drought, government action, difficulty in obtaining workmen, materials or transport or other circumstances whatsoever outside the control of the Supplier affecting the provision of the Goods and services hereunder or of materials therefor by the Supplier's usual source of supply or the manufacture of the Goods by the Supplier's normal means or the delivery of the Goods by the Supplier's normal route or means of delivery.

14. Termination

If the Client enters into a deed of arrangement or commits an act of bankruptcy or compounds with his creditors or if a receiving order is made against him or (being a company) he shall pass a resolution or the Court shall make an order that the Client shall be wound up (otherwise than for the purposes of amalgamation or reconstruction) or if a receiver shall be appointed of any of the assets or undertaking of the Client or if the circumstances shall arise which entitle the Court or a creditor to appoint a receiver or manager or which entitle the Court to make a winding up order or if the Client takes or suffers any similar action in consequence of debt or commits any breach of any part of the Contract the Supplier may stop any Goods in transit and suspend further deliveries and by notice in writing to the Client may forthwith determine the Contract without prejudice to the provisions of Conditions 5 c and 7 b thereof and to any existing claim.

15. Waiver

The failure on the part of the Supplier to exercise or enforce any rights conferred by the Contract shall not be deemed to be a waiver of any such right nor operate so as to bar the exercise or enforcement thereof at any time or times thereafter.

16. Notices

Any notice required to be given hereunder in writing shall be deemed to have been duly given if sent by prepaid first class post (airmail where the addressee is abroad) telex or telegraph addressed to the party concerned at its principal place of business or last known address.

17. Headings

Headings to any of these Conditions are included to facilitate reference only and shall not affect the construction hereof.

18. Governing Law

The Contract shall be governed by and construed and interpreted in accordance with Dutch law and for the purpose of settlement of any dispute arising out of or in connection with the Contract the parties hereby submit themselves to the jurisdiction of the Utrecht, The Netherlands Courts.
