PRODUCT SPECIFICATION SHEET

This document contains technical information about the MEETING POD

MODULAR DESIGN MADE WITH SUSTAINABLE MATERIALS, MANUFACTURED LOCALLY FOR A CIRCULAR ECONOMY

Introducing the MEETING POD, a noise-isolating oasis.

The MEETING POD offers various integration possibilities for its side- and back panels. It provides options for an integrated tabletop that can be elevated with a stool for a commanding perspective or set at a lower position with task chairs for a grounded experience. Furthermore, on the rear side, a tabletop can be seamlessly incorporated, available in elevated configurations with four stools for dynamic discussions or in a low position with comfortable sofas on both sides, perfect for extended meetings involving four to six individuals. For collaborative work, a Bridge table can be mounted at either a high or low position, providing two integrated workstations adjacent to each other.

The MEETING POD effortlessly blends into any preexisting or new space, arriving fully equipped with a motion-sensor-driven fresh air ventilation system, an automated LED lighting system, a primary power connection (230V), and multiple integrated multifunctional power sockets. (Includes 2 wooden crates, 4 ventilators, accommodates 4-6 persons, long meeting table option available, and the possibility of a Bridge table installation).

Pods with a mid-panel integrated at the back have an extra option using a 60mm diameter grommet placed 3cm above the floor in the middle. Because the panels at the outside and inside of the pod can be removed, a cable channel inside the wall is accessible and cables can be guided in any direction.

All pods will be delivered with a GST18 power block with four gangs and two five meter GST18 cables to connect the pod with power sockets to the building.
